# Medical Application – Very High Quality Video Over IP Applications for Hospital Signals Live Transmmission

In the surgery rooms of the big hospital, there are some of UHD video cameras to capture the high quality real time signals of procedure through out the operation.

The high quality real time signals will be tranmitted to the meeting rooms or other specialists' consultation, or recorded for the analyzations & educations in the future.

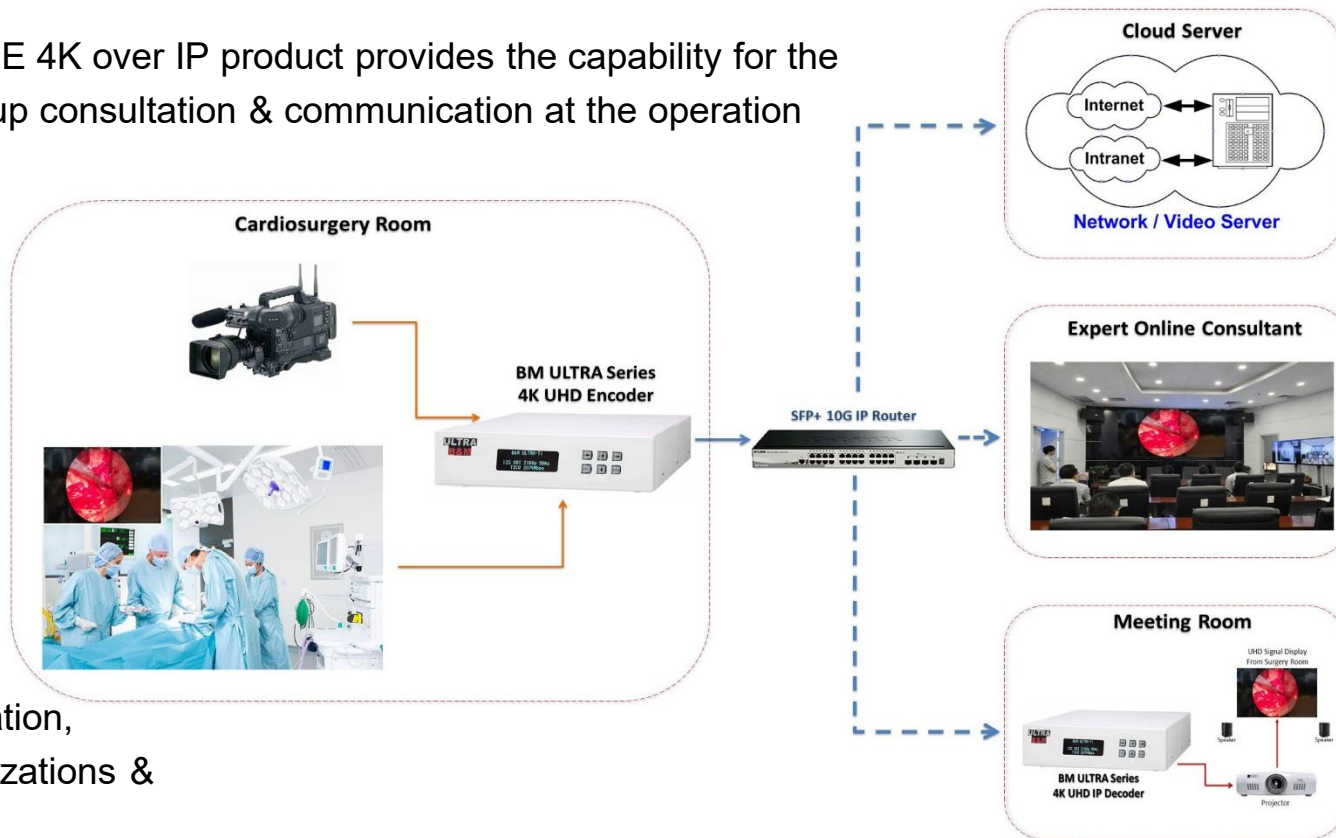

# Medical Application – Highest Quality UHD Video REAL TIME Transmitted Over IP

Some of high-precision surgeries need more outside experts to do the group consultation on the operation scene.

B&M ULTRA series TRUE 4K over IP product provides the capability for the REAL TIME experts group consultation & communication at the operation scene, with the highest visual lossless video quality through SFP+ IP transmission at the lowest latency (less than 40ms).

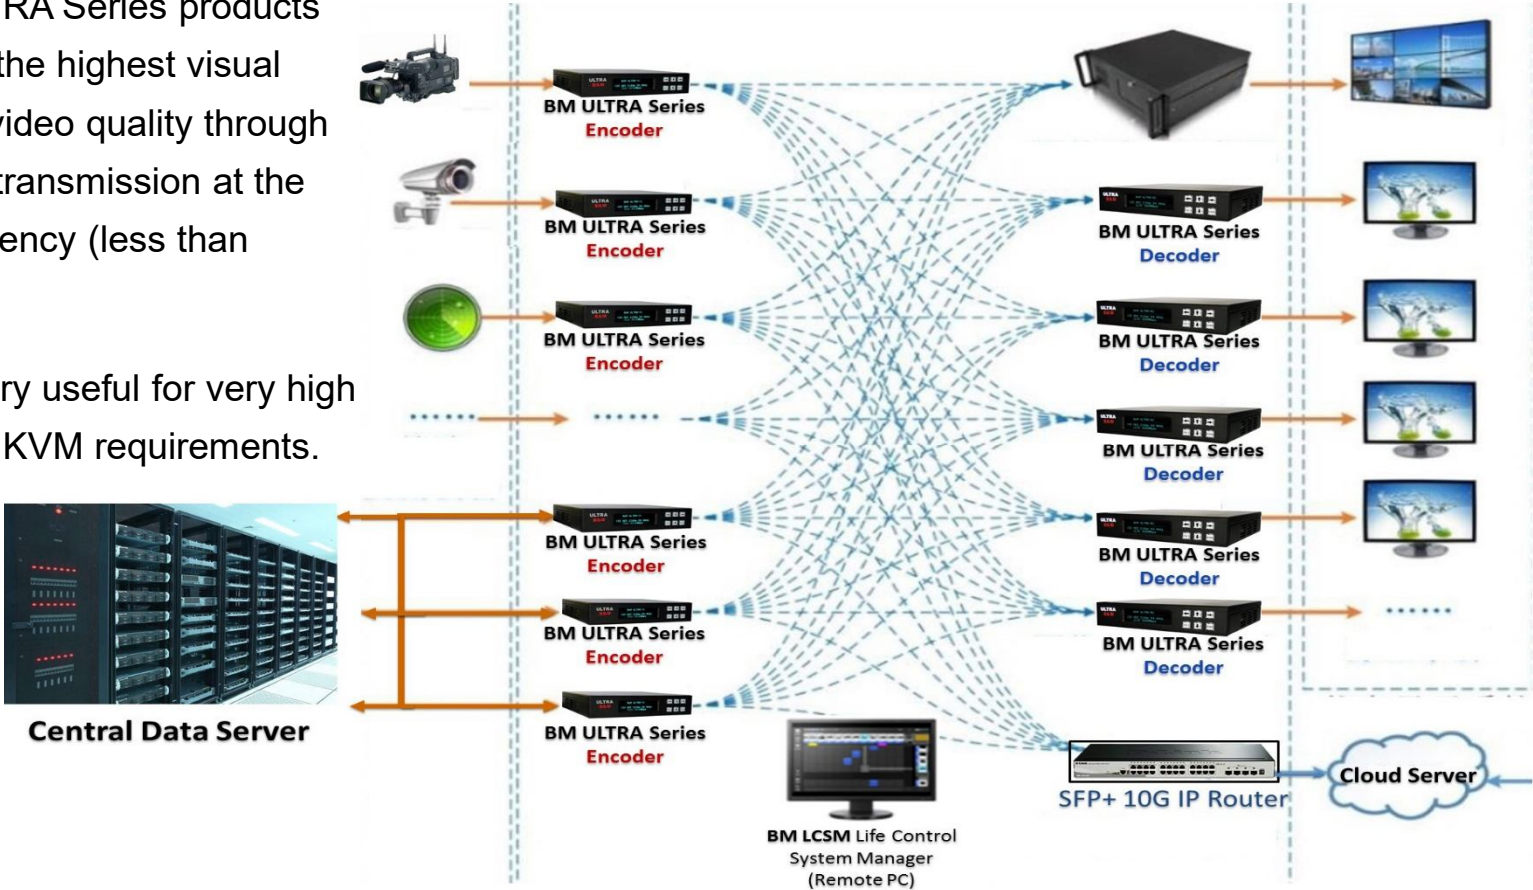

The highest quality real time signals will be REAL TIME transmitted to the meeting rooms or outside experts' consultation, or recorded for the analyzations & educations in the future.

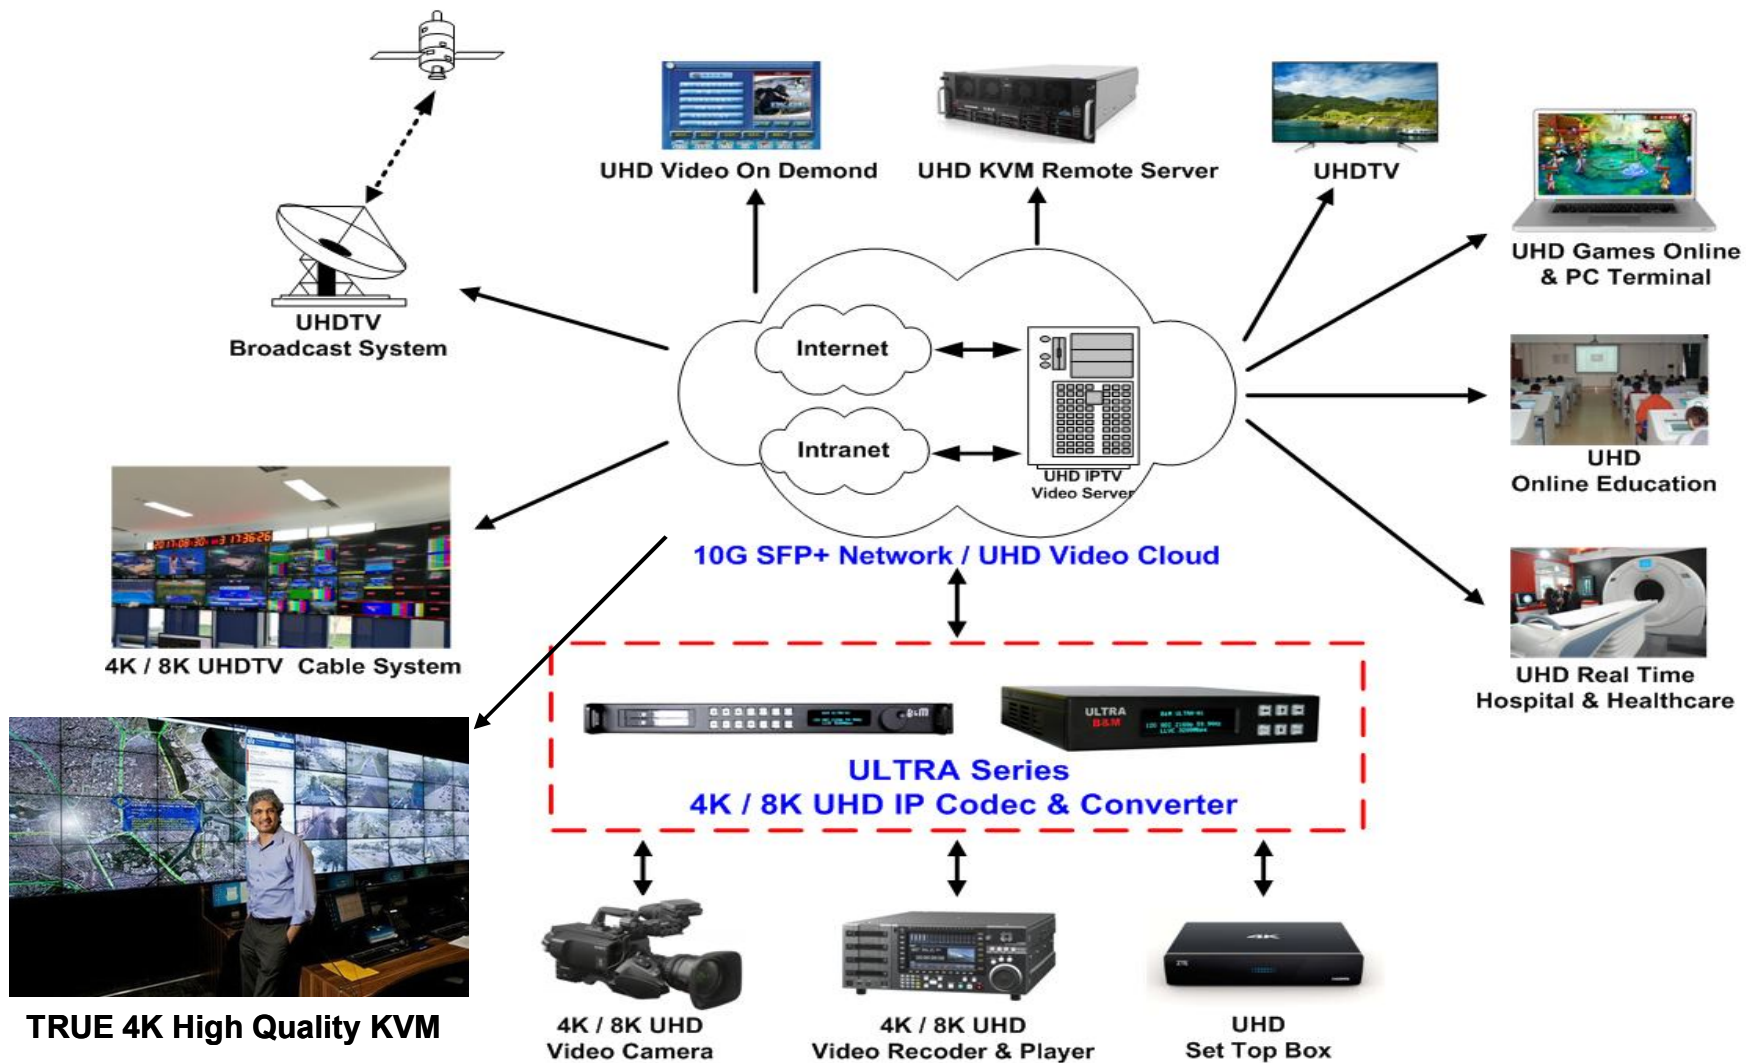

# Highest Quality TRUE 4K Video REAL TIME Transmitted Over IP For KVM

B&M ULTRA Series products provides the highest visual lossless video quality through SFP+ IP transmission at the lowest latency (less than 40ms).

This is very useful for very high definition KVM requirements.

# Available Applications for All of 4K & UHD/HD Video Products
