APT Mobile SureStreamer Tired of flaky remotes?

APT Mobile SureStreamer delivers pristine, uninterrupted audio from the field to ensure your remote is a success.

SureStream technology set an early precedent for delivering flawless audio over affordable public internet links and is now well-established as the technology of choice for professional AoIP STLs with 1000's of licenses sold worldwide.

Now, we can bring all the benefits of SureStream to your Remotes...

APT Mobile SureStreamer employs dual path audio over two redundant 3/4G networks of any combination to deliver you with a rock-solid connection. Set-up is pre-configured in the station beforehand so that tech or talent can connect immediately on start-up.

Typical Applications

Technical Features

FEATURES

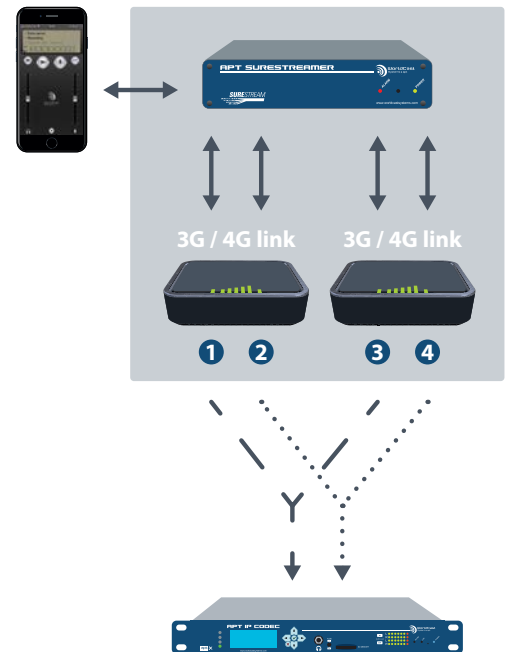

- Rock-solid remote connection over 3G/4G networks
- 6 hours battery life with easy swap-out or mains back-up options
- Simple power-up & connect makes it suitable for non-technical personnel
- Compatible with existing codecs
- Direct connection to any SureStream-enabled decoder
- Four universal Ethernet ports allow connection to any type of network access, e.g., xDSL, WIFI router, 3G/4G Router (supplied), Cable modem, Satellite terminal, IP Radio link and any other Enterprise network
- Can utilize cost-effective software IP audio codecs
- Works symmetrically on both sides of connection
- Not just audio! Protect your UDP video & live media streams with SureStream

Package includes:

Two 3G/4G modems with internal/external antennas
APT SureStreamer
Battery pack with charging status indicator
Protective Carry bag
YOU WILL ALSO NEED:
Audio codec (hardware or software)
Microphone
