KEY FEATURES

WELCOME TO A NEW ERA OF MONITORING & CONTROL

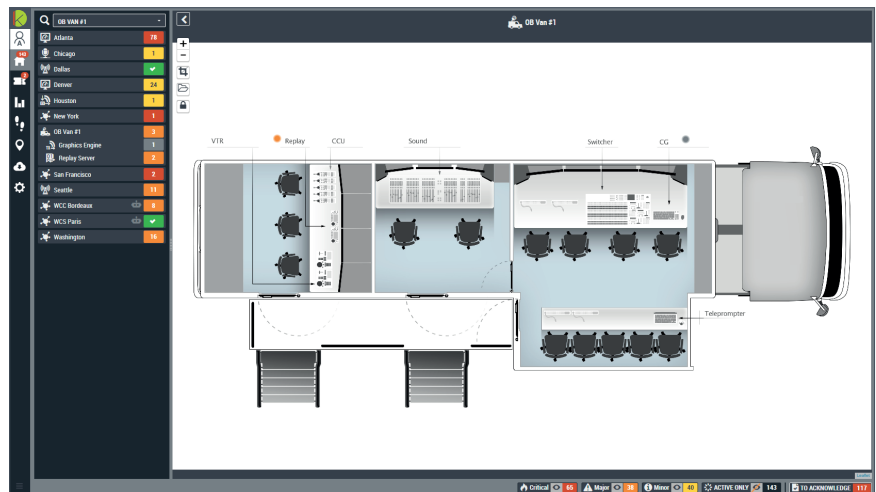

KYBIO is a vendor-agnostic, end-to-end monitoring and control platform.

It enables to oversee entire media and broadcast infrastructures by centralizing data and by streamlining the management of IP-enabled gear and technology. It comes with a built-in set of modules tailored for operation support, event tracking & correlation, remote control, advanced reporting and analytics.

Designed with scalability in mind, KYBIO enables easy deployment regardless of network size and complexity.

KYBIO Media provides media powerhouses and broadcasters with a powerful yet user-friendly platform to improve operations and facilitate insights-driven decisions with advanced analytics.

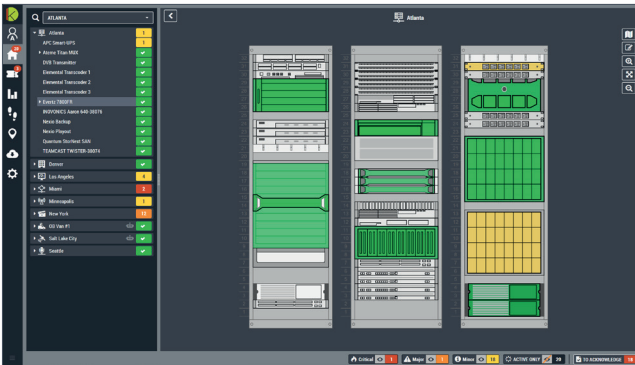

SIMPLE. POWERFUL. SCALABLE.

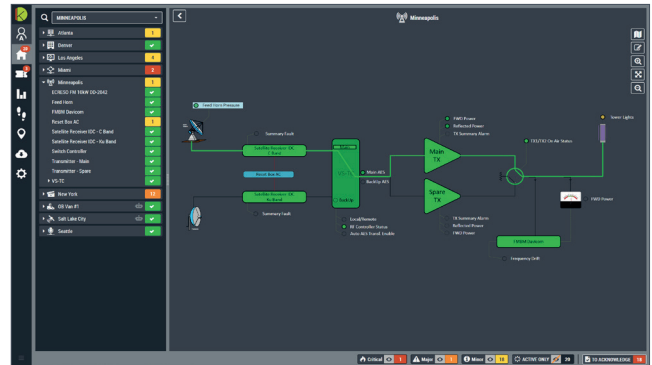

KYBIO - Site view

SIMPLE TO OPERATE

DYNAMIC DIAGRAMS WITH REAL-TIME STATUS & REMOTE CONTROL ACTIONS

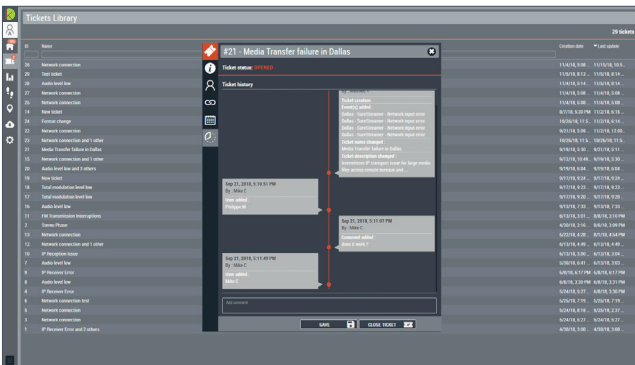

Diving into a site to explore the status of its equipment

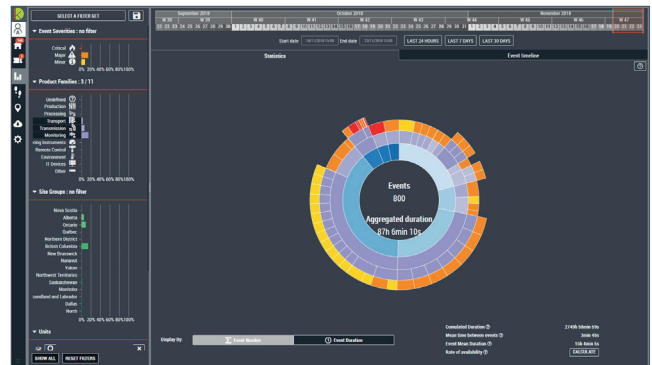

Real-time status of devices in a contextual diagram

TICKET & INCIDENT TRACKING COUPLED TO A VISUAL REPORTING ENGINE

Manage tickets & user assignments. Track operational responses.

Full details of any alarm or reading

HIGHLY SCALABLE & REDUNDANT ARCHITECTURE

Centralized deployment

Grid deployment with EdgeBots for decentralized monitoring & control

LARGE DRIVER LIBRARY

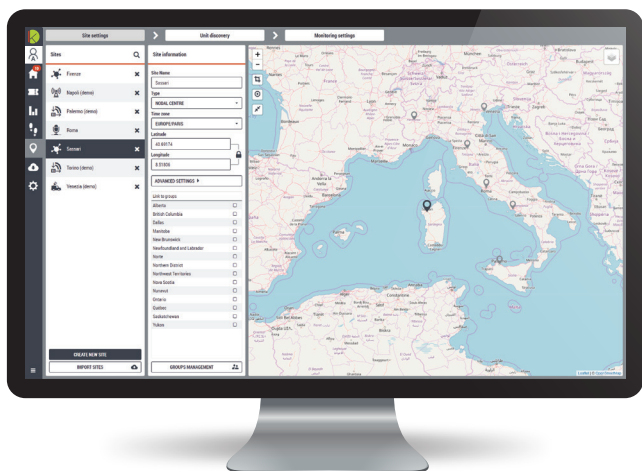

OPEN DRIVER POLICY

Can't find the integration driver you need in our existing library?
Send us your equipment documentation & let us build the driver for you!

*The driver creation service is complimentary with any support contract for the KYBIO On-Premise solution (perpetual or annual license), and subject to technical feasibility. It remains free of charge with the Premium support contract throughout product operation

SIMPLE TO ADMINISTRATE

Locate and identify your sites

AUTO-CONFIGURATION ENGINE

KYBIO is the easiest monitoring & control software to deploy. Its Auto-Configuration Engine guarantees a very fast startup, within minutes. It fully automates the equipment discovery and provides a fully graphical user interface for the administration of the platform in a few simple clicks.

OPEN IT ARCHITECTURE

KYBIO can be installed on any type of physical and virtual server that matches our specifications. It can be run on-premises, in the cloud or in a hybrid environment.

Supports multiple languages

English - French - Spanish - Portuguese
Chinese - Japanese - Korean

ORDER INFORMATION

KYBIO Media is available as a monthly SaaS, an annual license or a perpetual purchase.

SaaS SOLUTION (Software as a Service)

Choose from 3 licenses (Starter | Intermediate | Professional) and monitor up to 100 SNMP devices. Platform hosting, administration, and general maintenance are handled directly by WorldCast Systems. Includes drivers from our library and EdgeBot(s).

For more details, visit the Pricing page of our website.

ON-PREMISE SOLUTION (perpetual or annual)

CORE LICENCES

Standard Edition: Up to 25 / 50 / 100 / 250 / 500 / 1000 / 2500 monitored devices. Optional add-ons are available to enable additional functionalities.

Enterprise Edition: Designed for large and complex deployments, beyond 2500 monitored devices. The Enterprise Edition is supplied by default with the redundancy add-on license.

OPTIONAL LICENCES

Redundancy Licence

EdgeBots Licences (25 / 50 / 100 / 250 / 500)
for decentralized deployments

KYBIO API Licence for advanced integrations
with 3rd party systems

SUPPORT

Two levels of support contracts are available:

Standard support with hotline during office hours
(Mon - Fri, 9am - 5pm) (included in SaaS)

Premium support with a 24/7 hotline
& unlimited driver creation service.

Both support levels provide access to all software updates, the driver library, the Knowledge Base & our CRM/Support Portal.
