Ecreso FM - AiO Series

Efficient. Scalable. Rock-Solid.

The AiO series is the latest generation of FM transmitters from WorldCast Systems. Its cutting-edge design empowers broadcasters with the lowest Total Cost of Ownership achievable in FM today.

Available from 100W to 1kW, the AiO series delivers unparalleled efficiency. In its standard operations, broadcasters benefit from up to **76% efficiency** and when the patented SmartFM technology is activated, they can further reduce their **energy consumption by up to 40%**.

The AiO series also brings together the expertise of APT and Audemat into a compact **2U chassis**, resulting in a unique **APT IP Decoder** and a **full RDS encoder**.

Additional features such as the direct-to-channel digital modulator and a 5-band sound processor complete this flagship FM transmitter.

Benefits

Best Total Cost of Ownership On The Market

The new AiO series delivers the highest efficiency on the market: up to 76% before a SmartFM boost. With its extensive list of built-in features to reduce on-site equipment, its planar design, and hot swappable architecture, this new range of FM transmitters is proof that aligning cutting-edge innovation with the best Total Cost of Ownership is possible. Thanks to its rock-solid design, broadcasters also benefit from an unrivalled 10-year warranty.

Easy Migration To An All-IP Broadcast Chain

Enable a more seamless operation with less equipment: the AiO series includes a 5-band sound processor, a stereo encoder, digital modulator, and a full RDS encoder with UECP capabilities from WorldCast's Audemat range. This unique set of features is complemented by a software-based APT IP decoder that directly ingests audio and MPX over IP to the direct-to-channel digital modulator, fully compatible with SureStream and APTmpX.

Designed to operate REMOTELY

The AiO series provides advanced remote configuration and control. A user-friendly web and mobile GUI includes advanced troubleshooting tools:

- Functional diagrams,
- Advanced Measurement interface
- Spectrum analyzers
- 7-day Graphical History with 20 different sensors!

It also includes full SNMP management with 4 independent SNMP "manager" configurations, control and monitoring of all transmitter parameters, and alarms notifications by SNMP traps and e-mails.

SMARTFM[®]

SmartFM is a sophisticated algorithm which enables broadcasters to **significantly reduce their energy costs** without any **compromise on the audio quality and coverage**.

→ **Lowers energy costs by up to 40%** thanks to electricity savings.

→ **Reduces CO₂ emissions** for a cleaner, more sustainable environment.

Built-in APT IP DECODER

The embedded APT IP Decoder directly ingests audio over IP to the Direct-to-Channel Digital Modulator and is compatible with SureStream.

It also supports MPX over IP and the unrivalled MPX compression algorithm: APTmpX. This software feature helps broadcasters looking to modernize their network with a transition to all-IP broadcast chain!

10-Year Warranty

WorldCast Systems offers a standard warranty of 3 years on all FM transmitters and up to 10 years on the AiO series. No other FM transmitter manufacturer even comes close to that commitment or confidence! This 10-year warranty, unique on the market, is possible thanks to:

→ **Exceptional product design** → **Outstanding transmitter efficiency** → **Advanced diagnostic capabilities**

Built-in 5-Band SOUND PROCESSOR

Embedded into the FM digital modulator, the software sound processor offers an outstanding reliability and the highest signal quality.

You can choose from:

- A wide-band version to finalize the audio processed at your studio.
- A multi-band version to achieve the level of processing required for your station.

The processor is supplied with a full set of presets.

Integrated dynamic & FULL RDS ENCODER

After the worldwide success of Audemat RDS Encoders, WorldCast Systems has integrated its RDS expertise into the AiO series resulting in 2 RDS software options:

- The Dynamic RDS encoder equivalent to the previous Ecreso transmitters range.
- The Full RDS encoder by Audemat, a software version of the flagship Audemat RDS Encoder.

Highest Audio Quality

- Digital MPX over AES
- Intelligent automatic switching
- Digital Stereo encoder
- Direct-to-channel digital modulator

Designed to operate for decades

- 1+1 & N+1 solutions
- Hot-swappable PSU & fan
- Scalable hardware for software upgrade

Fully Controlled

- Automation engine with scheduler and presets
- SNMP & GPIO management
- Alerts notifications by email

Monitor your FM transmitters for **FREE** with **Kybio**
